

Egg Math

Materials Needed: storage bins or boxes, variety of tongs, clothes pin, plastic eggs, pom poms, rocks, bells, crumpled paper balls, paper, and a writing tool (pen or pencil)

Have your child practice using tongs to grab the plastic eggs and move them from the bin to the empty egg carton. This can also be done with pom poms, rocks, large bead, or anything else you can find around your home. Try using a clothes pin instead of tongs to strengthen motor skills.

Label a few of the egg carton holders with numbers your child is familiar with. Ask them to fill each holder with the correct number of items.

For example: 5 pom poms
1 bell
4 beads
