Five Little Raindrops

Weekly Read Aloud

I'm A Little Wiggle Worm

Literacy Activity

I'm a Little Wiggle Worm
(to the tune of I'm a Little Teapot)

I'm a little wiggle worm
(wiggle body and arms)

Watch me go.

I wiggle, wiggle fast
(wiggle arms fast)

or very, very slow.
(wiggle arms slow)

I wiggle, wiggle, all around
(wiggle in a circle)

and then I go,

back underground to the home I know.

(slow squat down to the ground)

Dramatic Play or Music Activity

Rain in a bag

Let's see if we can make something where we can watch rain fall.

You'll need: a gallon zip lock bag, ½ cup of water colored blue with food coloring, and tape.

Pour the water into the baggie, zip it tight, and tape onto a sun facing window in your home. After a while, you can watch how the sun will make the water rise (evaporate) and come back down in drops...rain in a bag!

Click [HERE](#) to see Ms. Pat make rain.

Math Activity

Puddle Jumping

Take your child outside in clothes that you do not mind getting wet. Next, dump a moderate amount of water onto the sidewalk. Allow your child to jump in the puddle and let's count how many times we jump. You can also prompt them, "Can you jump 3 times in the puddle?"

Science Activity

Let's create a Worm Farm!

Click on the worm picture below to watch Ms. Sue create a worm farm at home.

Here are some additional activities you may also enjoy

Science Activity

Ice Painting

Your little ones will love this sensory experience of touching and investigating ICE! The freezing and melting colored ice cubes also have a sensory experience for their noses. I used Kool-Aid!

- Colored packets of Kool-Aid (Add sugar to left over Kool-Aid to drink!)
- Ice cube trays
- Plastic Wrap
- Popsicle sticks (If you don't have popsicle sticks, let your child use his hands!)
- Food coloring (I didn't add food coloring and my colors were very light, you can add food coloring or use less water when making Kool-Aid)

To make the ice cubes less water color like add 1 tablespoon of flour to each color to make a thicker consistency.
