

deer

**Deer** stay outside all winter and bed down together in pine needles under pine trees for warmth at night.

badger

**Badgers** reduce their activity during the winter but they do not hibernate.

bear

**Bears** are hibernators. They stay in their dens. They sleep and wake during that time.

hedgehog

**Hedgehogs** do hibernate from October to April. They stay in their dens but do not sleep.

rabbit

**Rabbits** graze all year long outside no matter the weather.

**skunk**

**Skunks** do not hibernate;  
they huddle together in  
their dens to stay warm.
